

BPI System – Shipping, Packing, & Logistics Solution

In the fast-paced world of logistics and distribution, companies face compliance and safety risks in every direction. From secure storage and handling of sensitive materials to on-time delivery pressures, labor shortages and ever-growing safety hazards, there's no shortage of problems to untangle in order to stay profitable. Today's market leaders are leveraging automated EHS management systems as part of digital transformation strategies to counteract these risks and achieve operational excellence

Competition is strong in the logistics and distribution, with digitally enabled companies pulling further ahead every day and delivery timelines are tighter than ever, companies can't afford to let safety and quality be left behind or abandoned.

Developing a total safety culture is the best way to reduce total recordable cases of workplace incidents. A total safety culture is one where the entire organization considers safety a high priority, and factors safety into all decisions. According to the Occupational Safety and Health Administration (OSHA), a strong safety culture is especially important in organizations where high risk is seen daily.

BPI System EHS solution automation helps companies reduce safety risks, and boost operational efficiency, simplifying compliance with OSHA, DOT, and ISO requirements. The best way to reduce incident rates in your workplace is to create a total safety culture, where employee safety is a company-wide priority. This requires company-wide buy-in, comprehensive training and full communication from the top-level down.
